

Decrease Your Downtime and Operating Costs!!!

There are two ways to lose money by the minute in the die-casting industry - one is downtime, and the other is unnecessary maintenance costs. Reduce these two significantly and see a direct return on the bottom line. The SBS hand cabinet can clean and texture your molds right in your own plant. No more sending dies out and being at the mercy of a vendor's schedule - place your die in the hand cabinet, clean andpeen, and put it back into production.

Die and Mold Cleaning and Texturing

Custom made to suit your individual needs. Add a rotating turntable, a gun mover, increase the size of your pressure pot, electronic controls package -- just let us know, we build it for you!

Contact Surface Blasting Systems to learn more about the Custom Hand Cabinet. Automated custom blasting systems are our specialty.
